

# Horizon electric stove

This electric stove with the looks of a wood stove brings together the best of past and present. With the design of a classic wood-burning stove, this fireplace is instantly the centrepiece of your living room. The fireplace gives a lifelike fire and glow that can be adjusted to your taste in colour, flame speed and even with or without the sound of crackling fire. The fireplace can also heat in two modes (900watt and 1800watt). You can control the settings using the buttons or the supplied remote control.
